

Codora Open Questions

Product

- What is the exact scoring model for leaderboard ranking?
- Which stats deserve the strongest placement on day one?
- How visible should progress be compared with competition?

UX

- What should the post-submit explanation look like?
- How much of the AI code review should be surfaced to the user?
- Should the reviewer/docs area link directly into problems or remain fully separate?

Content

- What is the first content structure for problems and reviewer material?
- How should tags be managed over time?
- What part of the content will be generated versus manually authored?

Runtime

- What is the final execution and grading path for Python submissions?
- What should happen when a submission takes too long or fails to run?
